Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 and 9 are rejected under 35 U.S.C. 102(e) as being anticipated by Deitz et al. (US 6,578,158).

Regarding claims 1 and 9, Deitz discloses a loop diagnosis system for disk array apparatuses (figs. 1-2) comprising a recording unit (fig. 1, items 100 and 120) having several loops (item 115a and 115b) for executing instructions from a host unit (col. 5, lines 29-31) and several recording media (item 135), a loop monitoring unit (items 105a and 105b) for detecting any abnormality in any of the loops (col. 7, lines 38-46), and a loop controller (items 105a and 105b) for controlling the loops according to the result of the monitoring by the loop monitoring unit (col. 7, lines 38-46).

Allowable Subject Matter

Claims 2-8 and 10-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
